Coding Contribution Release 1

Team 14 – Community Organization (Yee Chen Fong n9602976)

Figure 1. Event Page (eventIndex.html)

The Main contribution I made during Release 1 is designing and coding the header of the website. The links I have design and coded (with help from teammates) include:

- Logo
- Users
- Events
- Search Bar
- Add events
- Function to display current user's name
- Notification
- Logout/Login

Figure 2.1. Contributions in Header (base.html)

```html
            <ul class="nav navbar-nav navbar-right">
                {% if user.is_superuser %}
                <li>
                    <a href="{% url 'admin:index' %}">
                        <span class="glyphicon glyphicon-plus" aria-hidden="true"></span> Add Events
                    </a>
                </li>
                {% endif %}
                {% if user.is_authenticated %}
                <li>
                    <a href="#">
                        Welcome, {{ user.username }}
                    </a>
                </li>

                <!-- Notify Dropdown -->
                <li>

                    <a href="#" class="dropdown-toggle" type="button" data-toggle="dropdown">
                        <span class="glyphicon glyphicon-bell" aria-hidden="true"></span>
                        <sup>{% notifications_unread %}</sup>
                    </a>
                    <ul class="dropdown-menu">
                        <li class="dropdown-header">Recent</li>
                        {% if notify_list %}
                            {% for notify in notify_list %}
                                {# description var is used to inject custom html #}
                                {% if notify.description %}
                                    <li><a href="{{ notify.verb }}">
                                        {{ notify.description }}
                                    </a></li>
                                {% else %}
                                    <li><a href="#">
                                        {{ notify.actor }}
```
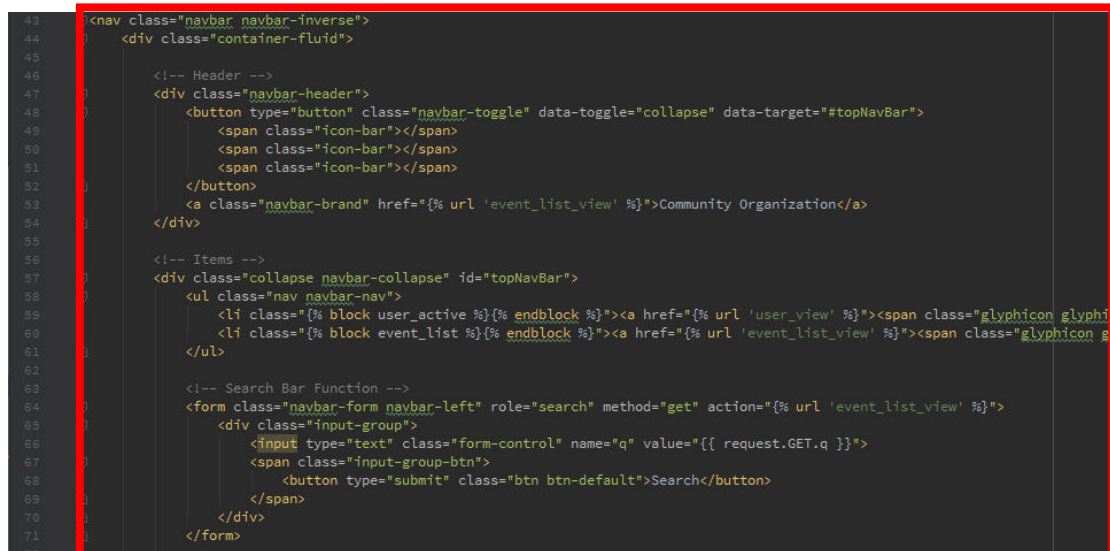

Figure 2.2. Contributions in Header (base.html)

```html
                                        {{ notify.actor }}
                                        {{ notify.verb }}
                                        {{ notify.target }}
                                    </a></li>
                                {% endif %}
                            {% endfor %}
                        {% else %}
                            <li><a href="#">No notifications</a></li>
                        {% endif %}
                        <li class="divider"></li>
                        <li class="dropdown-header">More</li>
                        <li><a href="{% url 'notifications:all' %}">View all</a></li>
                        <li>
                            <form action="{% url 'event_mark_all_view' %}" method="post" id="view_all">
                                {% csrf_token %}
                                <button class="btn btn-default" type="submit">Mark All as Read</button>
                            </form>
                        </li>
                    </ul>
                </li>

                <li>
                    <a href="{% url 'user_logout_view' %}">
                        <span class="glyphicon glyphicon-off" aria-hidden="true"></span> Logout
                    </a>
                </li>
                {% else %}
                <li class="{% block user_login_active %}{% endblock %}">
                    <a href="{% url 'user_login_view' %}">
                        <span class="glyphicon glyphicon-log-in" aria-hidden="true"></span> User Login
                    </a>
                </li>
                {% endif %}
            </ul>
        </div>
    </div>
```
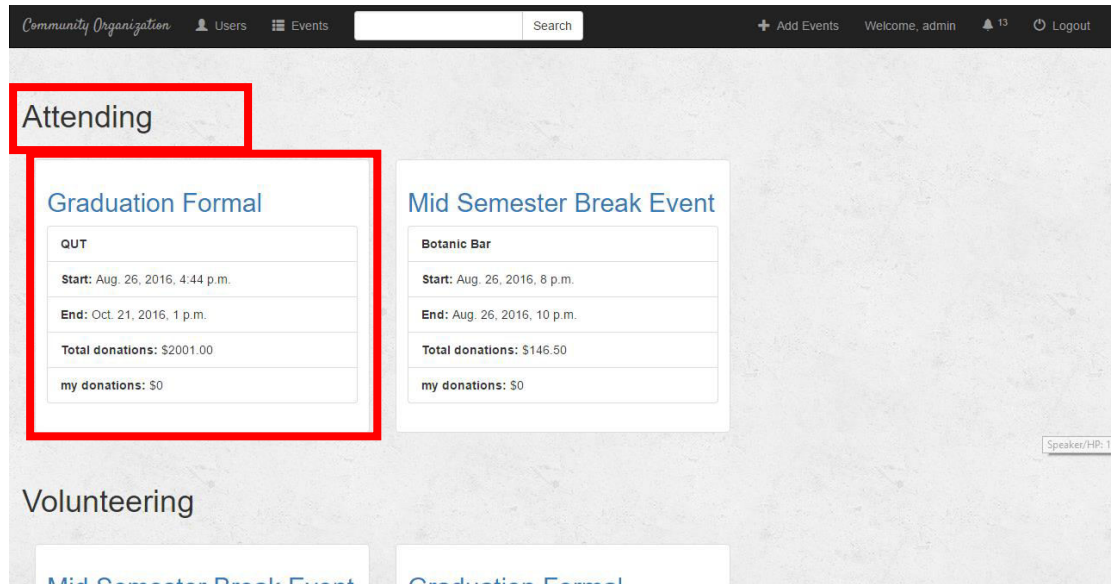

Figure 2.3. Contributions in Header (base.html)

I have contributed by helping coding the arrangement the list of events in the events page. Features include:

- The 'Attending', 'Volunteering' title
- Arrangements of events

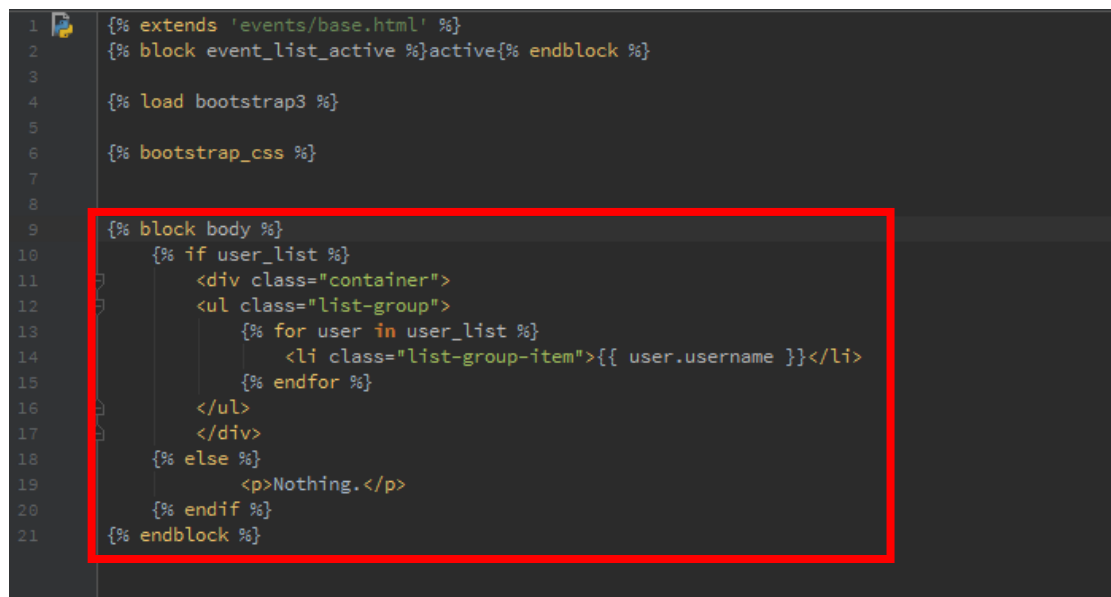

Figure 3. Users Page (users.html)

```
{% extends 'events/base.html' %}
{% block event_list_active %}active{% endblock %}

{% load bootstrap3 %}

{% bootstrap_css %}

{% block body %}
    {% if user_list %}
        <div class="container">
        <ul class="list-group">
            {% for user in user_list %}
                <li class="list-group-item">{{ user.username }}</li>
            {% endfor %}
        </ul>
        </div>
    {% else %}
            <p>Nothing.</p>
    {% endif %}
{% endblock %}
```

Figure 4. Involvement in coding users.html

I have also contributed coding the Volunteering and Attending List for each events.
